THIS IS UNEVALUATED INFORMATION

25X1

SOURCE [REDACTED]

1. The Schwarzhilde hydrogenation plant (now SAG Brikkett, Werk Schwarzhilde) was dismantled in 1945 and 1946 by the Russians for Poland. The following equipment was dismantled and shipped to Poland:
 - a. Two gas generators, type Koppers, for the making of synthesis gas each with a capacity of 25,000 to 30,000 cubic meters per hour.
 - b. Between 80 and 100 contact ovens, each with a capacity (Durchsatz) of 700 to 800 cubic meters per hour.
 - c. An active coal installation.
 - d. A condensation installation.
2. At the same time a cracking installation for the separation of light and heavy hydrocarbons according to the Carborol procedure, built by Still, was dismantled. It is not known if this installation was also sent to Poland.
3. The enterprise at present has the following equipment:
 - a. Five Koppers gas generators of the type dismantled in 1945/46.
 - b. About two hundred contact ovens of the type dismantled.
 - c. An active coal installation.
 - d. A condensation installation.
 - e. A cracking installation of the type dismantled.
